YOUR
FARM?

IS this your farm? Grasshoppers ravaged this field, destroyed others near by.

MEALS at all hours. At your expense!

DAMAGE complete. No grain remained.

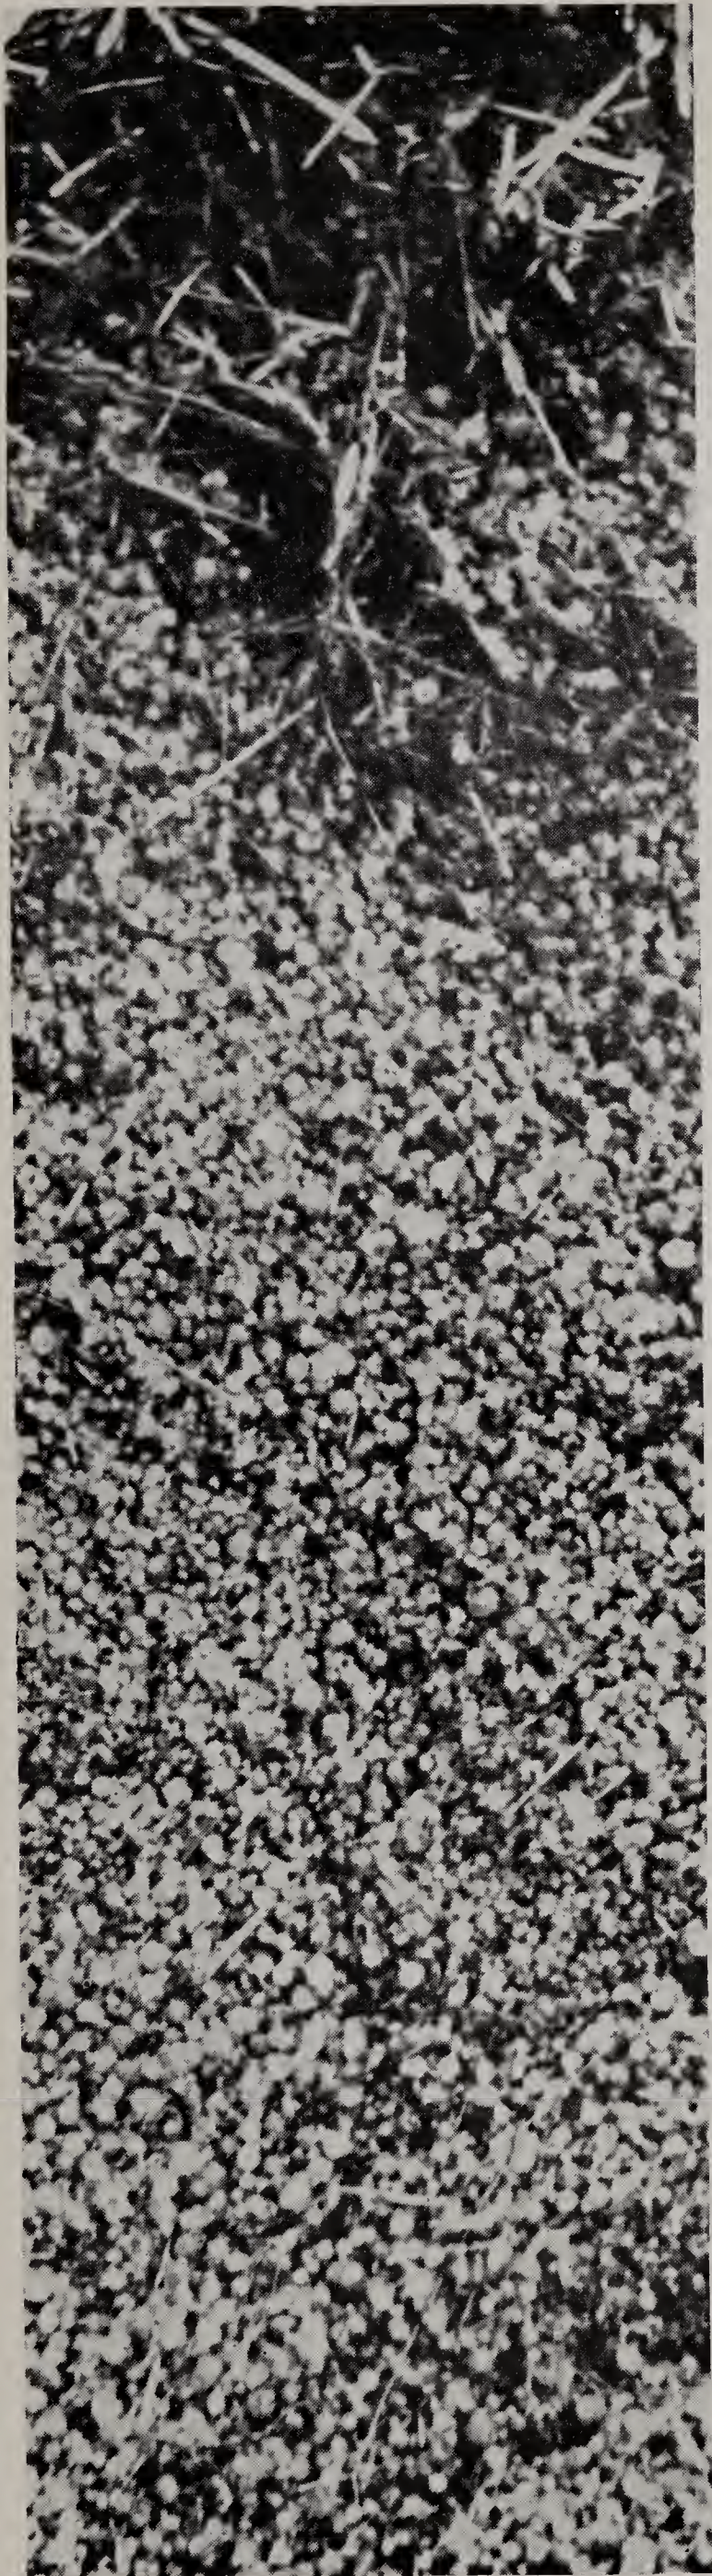

RESTING after eating their fill. Other wheatfields soon will feed these pests.

BAKED by the sun, this soil cracked, crumbled. Not even weeds could grow.

IS this your farm? Drought did this. You can count individual stalks!

←

MILLIONS of hail stones fell on this farm. Almost filled a ditch near wheatfield in the West.

→

RESULTS of a hail storm. Wheat heads cut off. Straw remains but no means of income. A year's work, investment for nothing! Has this happened to you?

YOU fight to protect your crop. Thousands also insure; a guaranteed protection.

MONEY goes up in smoke when fire destroys a wheat crop. No harvest this year.

←

GLOOMY days
with dust storms.
They steal your
soil and cost
you wheat in-
come dollars.
Would you pay
for protection
against this?

→

SUNSHINE
bares ravaged
soil. Where
wheat was
planted nothing
grows. You
CAN get pro-
tection from
dust.

BIRDS destroy in a few short hours what man spent time and money to accomplish.

→

WIND often levels near-ripe wheat. No man controls wind and rain but every grower now can protect his wheat income. All-risk insurance guarantees wheat income EVERY year.

↑

FLOODS sometimes are unstoppable, losses costly. Insurance offsets this!

RUST eats away YOUR wheat crop, sometimes. Insure against ALL plant diseases.

↓

SHRIVELED

PLUMP

If you have ever had your wheat crop destroyed by such forces of nature as pictured here—and most farmers have at some time in their farming operations—then crop insurance is made for you.

Never before have wheat growers been able to obtain an "all-risk" contract protecting them from every natural hazard beyond their control. It is the only protection **GUARANTEEING** wheat income from your land.

Since 1939 more than a million wheat farmers in the Nation have insured their wheat with crop insurance. Are you one of them?

Unless you have insured your next year's wheat crop, do it now. Don't wait until it is too late. Don't wait until drought, hoppers, hail, fire, flood, wind, or plant disease destroys your crop.

Remember, protection from **ALL** these hazards is given you under **ONE** contract, for **ONE** price. The cost of insurance for your farm will not be great.

Every farmer, at some time during his farming operations, loses his income because one of these hazards, or a combination of them, destroys his wheat. You won't be one of them if you see your county **AAA** committee today about insurance for your farm.
